Individual Notes:

Kiwi Blue is confident and self-assured. He shows little to no stress in new situations, around new people, or in circumstances that would typically be considered stressful. This puppy reacts appropriately to new sights and sounds that would typically be considered startling. He is curious and investigative to these sights and sounds. Blue has good memory focus and problem-solving abilities. He also has good motivations for interaction, food, and toys at fairly equal and balanced levels. He is socially appropriate in his interactions with littermates, with cats, and with other dogs. He is also socially appropriate in his interactions with people. He has excellent bite inhibition, but does somewhat use his mouth to initiate or engage in play. He is rarely vocal. This litter, overall, has no red flags and shows no possessiveness. They are comfortable and tolerant of handling and restraint. These puppies are very consistent with very few differences between them. They all have mid to moderate energy. They are playful, curious, social, and happy. They are eager, engaging, and they are content to explore and play on their own. Although, they prefer to be with and around people and actively work to get and keep your attention. These puppies are personable and affectionate. They are also gentle with handling an interaction. Overall, these puppies are well balanced and should adapt well in most any home. But, would do best in a home that is going to be interactive with them. These puppies have a good potential for therapy work.

Health notes:

Blue has shorter tail with kink.
