Individual Notes:

Lucinda white is confident and self-assured. She shows little to no stress in new situations, around new people, or in circumstances that would typically be considered stressful. She is fairly laid-back and takes things in stride. She is curious and investigative with new sights and sounds, including those that should be considered startling. She has a very good memory, focus, and problem-solving abilities for her age and stage of development. She also has good motivations at fairly equal and balanced levels for interaction, food, and toys. She is socially appropriate in her interactions with litter mates, cats, other dogs, and with people. She is rarely vocal and rarely uses her mouth to initiate or engage in play. She has excellent bite inhibition. The litter overall have no red flags and show no possessiveness. They are comfortable and tolerant of handling and restraint. These puppies are very consistent with very few differences between them. They all have mid-level energy. They are personable and engaging. They are content to explore and play on their own, but still affectionate and interactive. The puppies are playful, curious, happy, and social. They are very well balanced and should adapt well into most any home. Any puppy in this litter has potential for therapy work.

Health notes:

White has no health notes.
