### **7 Wk:**

#### **Litter Overall:**

The Stormy litter overall is confident and self-assured. Although, some need a minute to adjust in new situations, but they do very quickly on their own. They are appropriately social with other dogs, with one another, and with cats. They showed little to no stress in new situations, around new people, and circumstances that would be considered stressful. They react appropriately to new sights and sounds, being serious and investigate. A couple of them bark when they are insecure about something new, but for the most part the vocalization is manageable and not overzealous. They have good memory, problem-solving ability, and focus for their age. They have very good motivation for interaction. They are also motivated by food and toys. They are appropriate in their social interactions with people, being very comfortable and tolerant of handling and restraint. They rarely use their mouth. They have no red flags and show no possessiveness.

#### **Individual Notes:**

Red has mid-level energy. She is a little unsure to start in new situations, but adjust very well on her own. She is very sweet and interactive. She is very naturally respectful and gentle with interaction. She is very playful and curious. She is motivated by interactions. She is also interested in food and toys. She is content to explore and play on her own. Although, she prefers to be with people. She would be well-suited in most any home that is going to give her an opportunity to adjust to new things.

#### **Health notes:**

Red has base narrow level one, which she should outgrow.
